

## ABOUT MY COMPANY

Debra McClure Logo Design, LLC, began in 2002. It was the result of years of learning Adobe Illustrator mostly, but also Photoshop, Flash, Dreamweaver, and Frontpage. I am entirely self-taught. And as they say in the education profession, the best way to learn something is to teach it to someone else.

As a high school technology teacher who wanted to supplement my income a little, I decided to take the skills I have developed to market.

After many years of creating lessons for students, I thought it was time to use my skills helping small businesses without huge marketing budgets get the materials they need to promote their business at an affordable price.

## MY SERVICES

I offer clean and simple website and logo design services. By offering a wide range of design packages I can assist small business owners in getting the custom look they want for their company at the right price.
